

ITfusions

At the heart of your business

Company Introduction

Birmingham based IT Fusions is a total solutions provider. We undertake all the consultancy, project management and implementation of IT infrastructure changes through bespoke projects, and IT Outsourcing. A decade of corporate IT solution delivery has enabled IT Fusions to specialise in providing a consistent quality service to every business within the Small, Medium and Corporate sectors.

Our technology consultants are inspired through delivering benefits using the latest advances in technology. Creating solutions specific to your every need. Certified engineers delivering new technologies to clients with guaranteed levels of support. This ensures that our clients have the technology to develop their business.

Creating opportunity through efficiency and innovation, to maintain our clients ability to develop and grow. Our clients have recognised that Information Technology is a key success factor within their business.

Adding Value

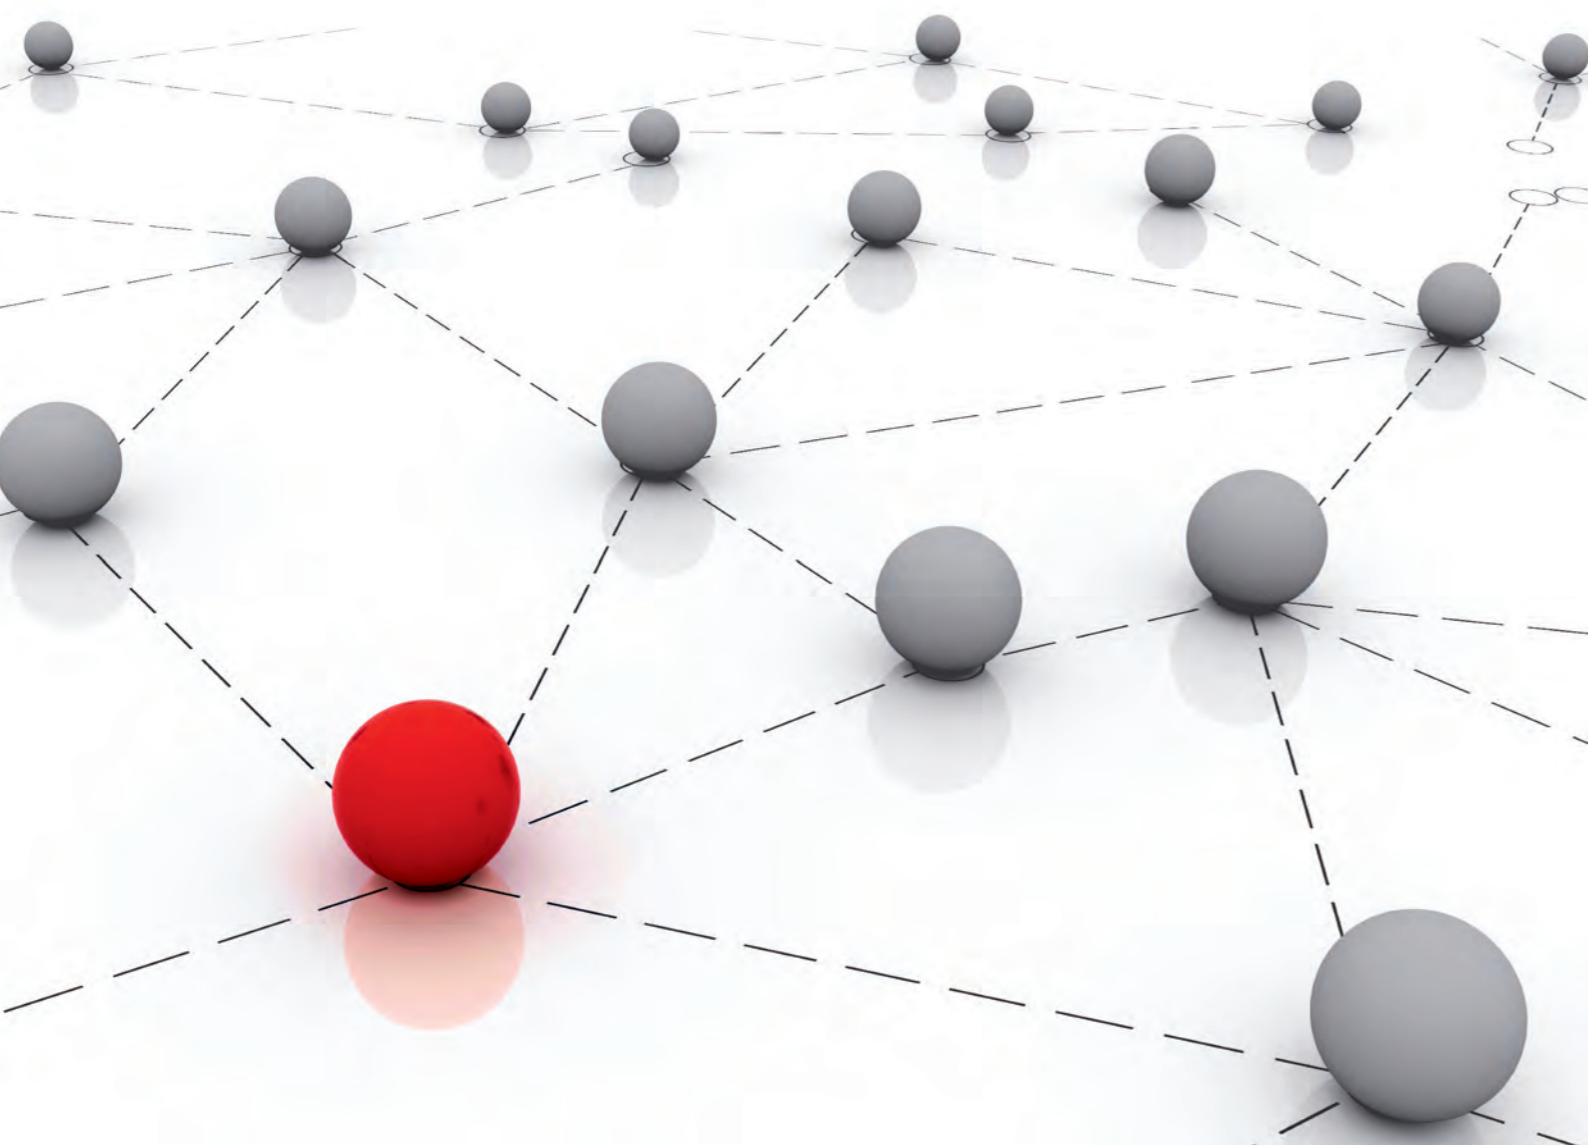

We appreciate it is fundamental to deliver added value to our clients through providing the best services in the marketplace. Long term benefits can only be achieved through selecting the right business partner for your IT infrastructure.

Trained engineers deliver pioneering solutions to utilise all the advanced technology within your IT infrastructure. Centralising information to provide access to all users. Sharing equipment to reduce hardware costs. Eliminating downtime with proactive support, through 24hour network monitoring.

Our Outsourcing service delivers unprecedented privileges to our clients by managing the entire infrastructure. A Virtual IT department responsible for every IT issue within your business. Outsourcing all the burden of IT management and operations to reduce IT expenditure.

With a 24hour helpdesk you can instantly have access to telephone support, onsite engineers and our 24hour workshop facilities. Our worldwide access solutions enable your users to access the network no matter where they are in the world, whilst enabling us to remotely support them.

I.T. Infrastructure Solutions

We deliver solutions to businesses that have no IT personnel and businesses that simply require additional support for their IT department. Implementing Vendor approved solutions to deliver all the benefits of technology, ensuring great returns on your IT investment.

Our independent advice and quality assurance policy ensures the delivery of bespoke solutions to every client. Designing solutions that are efficient and robust to reduce business impact.

Providing a range of IT services enables us to deliver exactly what you require. Infrastructure upgrades, Installing servers or desktops, undertaking office moves or just a new email or antivirus solution. We are committed to delivering projects that meet your needs, whilst providing long term support.

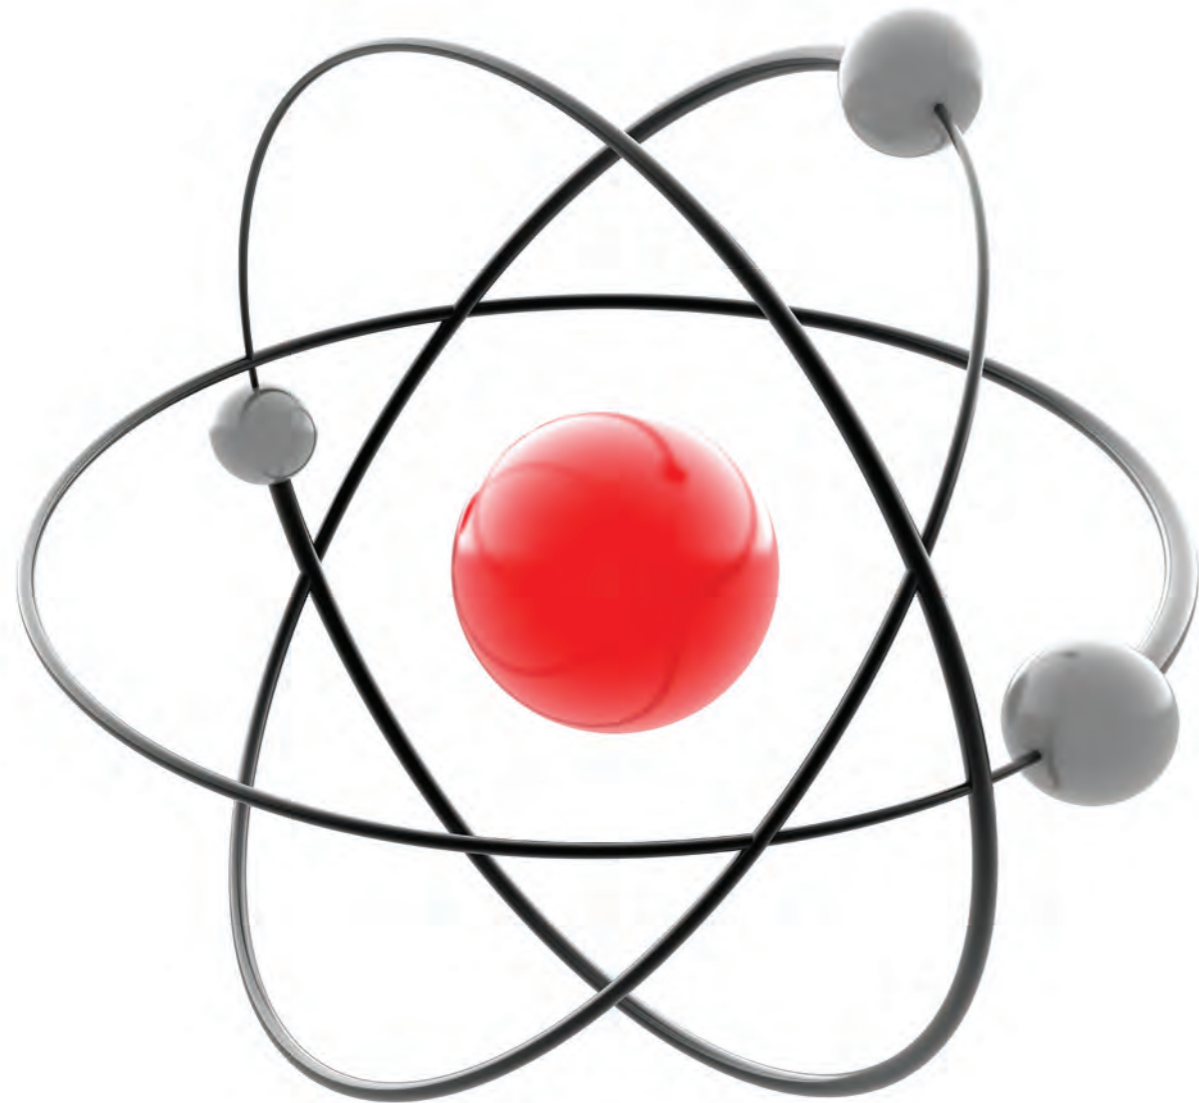

Outsourcing

IT Fusions specialise in providing the services of an IT department, through outsourcing. This enables you to continue focusing on your business needs. With a decade of experience in outsourcing, we will tailor an IT support model that suits your business.

Every client benefits from Real Time system monitoring to continuously improve the performance and reliability of your network. With a 24hour, 365 day helpdesk we provide instant global support to every user within your business.

Our Service Level agreements and guaranteed response times ensure we act instantly to your helpdesk requests. Delivering scalable solutions that support any business change, to embrace new developments in technology and innovation. We will be responsible for the entire IT infrastructure, maintaining it as if it were our own.
